Food Security Assessment and Nutritional Data
In the Red Sea State

RED SEA UNIVERSITY

Edited by
Ahmed Abdel Aziz (PhD)
September
2010

DRAFT
# Table of Contents

Executive Summary........
Forward...............................................................

**Chapter One: Red Sea State: Background Information**
1-1 RSS location and topography....................
1-2 Demographic context........................................
1-3 Ethnicity and tribal identity
1-4 Partners of development...............................
1-5 Adaptation mechanisms
1-6 Bilateral humanitarian and development activities

**Chapter Two: Livelihood opportunities**
2-1 Transhumant Pastoralists
2-2 Crop production
2-3 Marine resources and fishing
2-4 Wage labour migration
2-5 Exploitation of natural resources
2-6 Development potentials
2-7 Food aid and external assistance
2-8 Coping strategies and adaptation indicators

**Chapter Three: RSS food security assessment – locality surveys**
3-1 Objectives of the study..............................
3-2 Methodology
  3-2-1 Sample size and distribution
  3-2-2 Data collection
  3-2-3 Data analysis
  3-2-4 Limitation of the study
3-3 Findings
3-1 Wood and Charcoal Selling
3-2 Consumption Modification
3-3 Selling of Livestock.................................
3-4 Sale of Household Assets
3-5 Coping Strategies Index
3-6 Food Aid and External Assistance
3-7 Livelihood Outcomes
3-8 Number of Months of Household Food Insecurity
3-9 Food Consumption Patterns
3-10 Nutritional Outcomes
3-11 Linking Nutritional Status with Household Livelihood Data
3-12 Morbidity Patterns
3-13 Mortality Rates
3-14 Livelihood Outcomes by Poverty Group
3-15 Livelihood Vulnerability: Major Findings
3-16 Current Livelihood Trends
3-17 Household Vulnerability under Current Conditions
4- **Chapter Four**: RSS locality Gaps and Priorities

*4-1 Agig locality*
*4-2 Durdeib locality*
*4-3 Gonob and Olieb locality*
*4-4 Halaib locality*
*4-5 Haya locality*
*4-6 Gebeit Elmaadin locality*
*4-7 Port Sudan locality*
*4-8 Sinkat locality*
*4-9 Suakin locality*
*4-10 Toker locality*

**Chapter five**: The EWS Role

*5-1 RSS Early Warning System*
*5-2 EWS evaluation*
*5-3 Technical support for RSS-EWS*
*5-4 Institutional support for RSS-EWS*

**Chapter six**: Towards integrated food security strategy

*6-1 Improve house hold food production capacity*
*6-2 Increase income and job opportunities*
*6-3 Improve nutrition and food safety*
*6-4 Enhance safety nets*
*6-5 Institutional arrangements*
*6-6 Recommendations*

**List of Annexes**

Annex I: Terms of Reference
Annex II: Community Interview Questionnaire
Annex III: Food Security Household Survey
Annex IV: Sampling Table
Annex V: Nutritional Assessment Questionnaire
Annex VI: List of Team Members
Annex VII: Map of Kassala and RSS
Annex VIII: Coping Strategies Index
Annex IX: Terms of Trade
Annex IX: Calculating the Food Deficit

**List of Tables**

Table 1: Selection of areas ...........................................
Table 2: community sampling for RSS localities ......
Table 3: Population settlements at RSS localities.....................
Table 4: Livelihoods..............................................................
Table 5: Income distribution..................................................
Table 6: risks encountered by RSS localities...........
Table 7: Education units in RSS localities....................
Table 8: School drop-outs at RSS localities...........
Table 9: RSS School feeding program............................
Table 10: Suitability of food as seen by RSS communities................
Table 11: Componen ts of food as seen by RSS communities............
Table 12: Store availability at schools of RSS localities........
Table 13: Availability of kitchen at schools of RSS localities......
Table 14: Energy source at schools of RSS localities........
Table 15: Water source used for cooking for schools at RSS localities
Table 16: Utensil availability at RSS schools.
Table 17: Health institutions at RSS localities.
Table 18: Presence of health workers at RSS localities.
Table 19: Pregnancy and gender.
Table 20: Feeding of children under five in RSS localities.
Table 21: Drinking water sources in RSS localities.
Table 22: Drinking water continuity at RSS localities.
